Projects

Real-Time People Counting System

IoT-based project using Arduino and sensors integrated with a MERN stack web dashboard to monitor real-time footfall.

Chatty App

Built with React and Firebase, enabling real-time chat with clean UI and user authentication.

Skills

Frontend: React.js, HTML5, CSS3, JavaScript (ES6)

Backend: Basics of Node.js, Express.js, MongoDB (ongoing learning)

Tools & Platforms: Git, GitHub, VS Code

Profile

React.js developer with a diploma in IT, currently expanding skills in the full MERN stack. Passionate about building modern web applications and seeking frontend development opportunities.

Education

Diploma in Information Technology

Government Polytechnic Lohaghat

08/2023 – 06/2025 | Lohaghat, India

12th (Intermediate)

Pandit Beni Ram Punetha Inter College, Lohaghat

07/2020 – 03/2022 | Lohaghat, India

10th (Secondary School Certificate)

Government Inter College, Dovabhagu

04/2014 – 03/2020

Interests

- Listening to music while working on React projects to stay focused and creative.
- Passionate about coding, especially JavaScript and React.js
- Exploring new web technologies and frameworks
- Improving typing speed and accuracy on Monkey.com
- Listening to music for relaxation and motivation
- I enjoy watching English story-based content on YouTube to improve my listening skills and learn new vocabulary.

Certificates

Certificate of Industrial Training

Completed 1 month industrial training on MERN stack basics and overview of full-stack web development.

Ongoing MERN Stack Course with Knowledge Gate (Online)

Currently learning backend development (Node.js, Express.js, MongoDB) after completing frontend (React.js, HTML, CSS, JavaScript) as part of this course.
